Site Description	Internal diam. 19m. A sub-circular area enclosed by a collapsed stone wall, rebuilt along the S and W sides, and heavily over-grown. The collapse scatter extends as much as 5.5m on the SW side. Lanes run along the E and N sides of the monument. It is situated in good land on the SE slope of Dooish mountain.	
Landscape Context (setting)	Located approximately 1km south-southwest of the village of Church Town and approximately 4km north-northwest of SaintJohnston	
Site Appraisal	The site is very much extant and very easily accessible from the road.	
Sensitivity	This monument is somewhat sensitive to damage from human interference and agricultural activity, though its RMP status helps to avoid this.	
Associations	It may be contemporary and associated with Ringforts at Liscally (DG055-012) and Liscally Lower (DG055-006) approximately 2km northwest and north of the site respectively.
