Site Description	Description: A flat cemetery of 7 cists all containing skeletal material was found here. One contained a Pygmy cup and another a vessel of some kind. It was situated in good cultivated land. (Waddell 1970, 113).	
Landscape Context (setting)	Sited on good arable land.	
Site Appraisal	A substantial flat cemetery, now likely to be wholly removed. A site worthy of note however due to rarity value.	
Sensitivity	This site is likely to be wholly removed therefore no threats are determined.	
Associations	Artefacts (pottery) were found with some of the burials and are likely to be housed in NMI.	
Recommendations	This site does not have good visual impact for tourist potential however investigations could be made in terms of the location/condition of the artefacts found which may be a good visual/display piece for promotion of the LCA/region.
